

FREE ICTM Webinar - OPEN to ANY EDUCATOR!

Teaching Math in the Age of AI: Possibilities & Pitfalls (6-12th grade)

Speaker:
Adam Poetzel

Attendees earn
1 free IL PD hour!

Wed, Oct 14th
2026

Understanding what AI can do is increasingly important for math educators—but equally important is knowing when its use supports mathematical thinking as opposed to when it bypasses mathematical thinking. In this webinar, Adam Poetzel will explore the possibilities and pitfalls of AI in mathematics education, with a focus on making thoughtful choices about when, why, and how AI should—and should not—be used. Together, we'll consider emerging practices, classroom examples, and key questions for protecting the thinking and learning we want students to do in an ever-evolving AI landscape.

All educators
are welcome
to attend!
